

2011

Nova Scotia

ANNUAL REPORT

Service Nova Scotia
and Municipal Relations

Vital Statistics

His Honour Brigadier-General The Honourable
J.J. Grant, CMM, ONS, CD (Ret'd)
Lieutenant Governor
Province of Nova Scotia

Your Honour :

I have the pleasure of presenting the Report of the
Registrar General containing the Vital Statistics of the
Province for the year ending December 31, 2011.

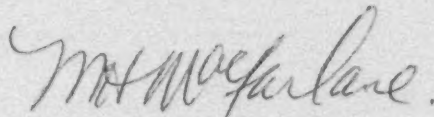

Mark Furey
Registrar General

To The Honourable Mark Furey
Registrar General
Province of Nova Scotia

Sir :

It is my privilege to present to you the Report of the
Deputy Registrar General containing the Vital
Statistics of the Province for the year ending
December 31, 2011.

A handwritten signature in cursive script, reading "Michelle MacFarlane".

Michelle MacFarlane
Deputy Registrar General

Introduction and Highlights of
Statistics

Introduction

The 2011 Annual Report of births, deaths, stillbirths, marriages and domestic partnerships is compiled by the Vital Statistics Unit of Service Nova Scotia and Municipal Relations. Data on vital events occurring in Nova Scotia has been published since 1917. The information presented in the following charts and tables is based upon data collected on vital event registrations.

The *Vital Statistics Act* (Chapter 494 of the Revised Statutes of Nova Scotia, 1989) requires that all births, deaths, stillbirths, marriages, and domestic partnerships in the province be registered with the Vital Statistics Office.

Vital Statistics is also responsible for administration of the *Solemnization of Marriage and Change of Name Acts* of Nova Scotia.

The provincial registration system serves two primary functions:

1. to obtain and preserve the documentary evidence necessary to provide individuals with official proof of the facts concerning a birth, death, stillbirth, marriage or domestic partnerships; and
2. to provide information and statistics to health professionals and planners for public health surveillance, health education and promotion, epidemiological research, and health planning.

Vital Event Data

This report summarizes information on vital events that occurred in the province to Nova Scotia residents. It excludes events to non-residents except where specifically noted. Statistics relating to Nova Scotia residents who gave birth, were married or died outside the province are also excluded. Marriage statistics summarize all events that occurred in the province to either residents or non-residents.

To maintain confidentiality, identifying information for individuals is not disclosed. At the national level Nova Scotia Vital Statistics, along with all other Canadian provinces and territories, shares data with Statistics Canada for further compilation, analysis, reporting and comparison. Information on vital events that occur to Canadians outside their province of usual residence is made available through their publications.

Time Periods

This report covers events occurring in the calendar year 2011. Selected tables present aggregate data across a number of years.

Population Data

Population estimates were provided by the Demography Division of Statistics Canada.

Medical Coding

Medical Certificates of Death and Stillbirth provide information on the immediate cause of death or stillbirth, antecedent causes giving rise to the immediate cause, and other significant conditions

contributing to the death or stillbirth. The World Health Organization's International Classification of Diseases (ICD) coding scheme is used to assign the appropriate medical codes. This information is processed by Statistics Canada in Ottawa, using scanned images of Registrations.

Since the early 1900's, the International Classification of Diseases has been revised regularly in order to reflect advances in medical science and changes in diagnostic terminology. The ninth revision of ICD (ICD-9) was used for medical coding until 1999. Coding according to the tenth revision of ICD (ICD-10) was implemented nationally as of January 1, 2000.

Acknowledgments

Vital Statistics would like to acknowledge and thank the many groups and individuals who ensure complete and accurate recording of vital events, including our division registrars of births, deaths and stillbirths located in hospitals and funeral homes, deputy issuers of marriage licenses, physicians who certify causes of death and stillbirth and the Provincial Medical Examiner's office at the Department of Justice. Vital Statistics also wishes to thank and acknowledge Sarah Galloway, Research and Statistical Officer for Vital Statistics, for her contribution as the primary author of this report.

Other Information and Contact Information

More information on the Vital Statistics Unit of Service Nova Scotia and Municipal Relations is available on our website at <http://www.gov.ns.ca/snsmr/vstat/>. Previous years' Annual Reports, back to, and including 2002, may be accessed online.

Summary of Operating Statistics

Vital Statistics is mandated to provide the public with services relating to vital events that occur in Nova Scotia, in accordance with the *Vital Statistics Act*. To meet this mandate, the office is responsible for maintaining the provincial registry for births, deaths, stillbirths, marriages, and domestic partnerships and for issuing certificates for these events. The registry maintains data that assist in the decision-making process for health planning and monitoring, policy formulation and comparisons with other jurisdictions across time, and for preparing statistics for the public for business planning, trend analysis, etc. Additional services, provided under the *Solemnization of Marriage Act* and the *Change of Name Act*, include: registration of clergy and civil marriage officiants, issuance of marriage licenses, and registering legal changes of name.

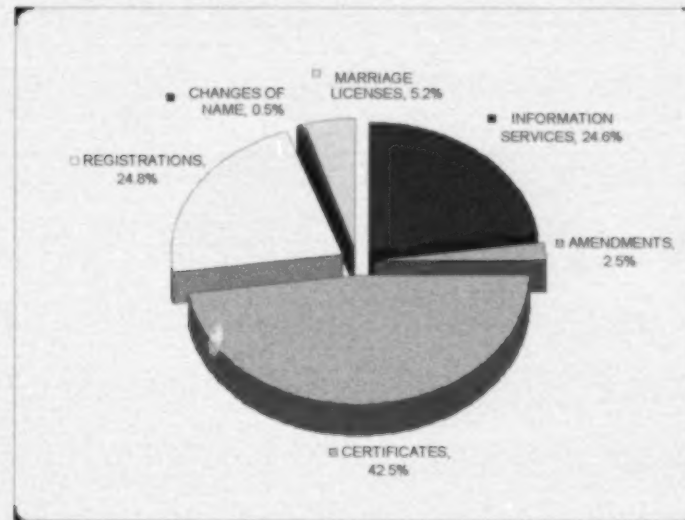

Services provided, Vital Statistics 2011:

SERVICES	TOTAL NO:
BIRTH, DEATH, AND MARRIAGE CERTIFICATES ISSUED	37,248
BIRTHS, DEATHS, MARRIAGES, STILLBIRTHS, AND DOMESTIC PARTNERSHIPS REGISTERED	21,737
CHANGES OF NAME PROCESSED	400
MARRIAGE LICENSES SOLD	4,533
INFORMATION SERVICES PROVIDED (PHONE AND EMAIL)	21,613
AMENDMENTS PROCESSED (INCLUDING DELAYED REGISTRATIONS AND ADOPTIONS)	2,194
TOTAL SERVICES	87,725

Service Channels Used by Customers:

ERROR RATE ON REGISTRATIONS AND TRANSACTIONS	<1%
PERCENTAGE OF MAIL TRANSACTIONS COMPLETED WITHIN 10 DAYS	78%
PERCENTAGE OF MAIL TRANSACTIONS COMPLETED WITHIN 5 DAYS	42%
PERCENTAGE OF CHANGES OF NAME PROCESSED WITHIN 10 DAYS	77%
PERCENTAGE OF CUSTOMERS WAITED ON WITHIN 10 MINUTES	81%
AVERAGE CUSTOMER WAIT TIME (MINUTES)	8
PERCENTAGE OF CUSTOMERS SERVED IN LESS THAN 10 MINUTES	78%

On a Typical Day in Nova Scotia in 2011

24 LIVE BIRTHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:

- 12 males and 12 females*
- 9 babies were born every 7 days to teenage mothers*
- 11 babies were born to parents not married to each other*
- 2 live births were registered with no father named*
- 10 low birth weight babies were born every 7 days (< 2500 grams)*
- 1 multiple birth occurred every 3 days*
- 1 stillbirth occurred every 5 days*

23 DEATHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:

- 11 males and 12 females*
- 6 deaths were due to diseases of the circulatory system including:*
 - 3 - deaths from heart disease*
 - 1 - death from cerebrovascular diseases*
- 7 deaths were due to cancer including:*
 - 2 - from lung cancer*
- 2 deaths were due to diseases of the respiratory system*
- 1 death resulted from accident or violence*
- 1 death every 3 days were due to diabetes*
- 2 deaths every 3 days were due to Alzheimer's disease*
- 1 death occurred every 60 days due to AIDS/HIV infections*
- 1 infant death occurred every 10 days*

12 MARRIAGES WERE SOLEMNIZED IN NOVA SCOTIA:

- 6 were civil ceremonies and 6 were performed by religious representatives*
- 8 marriages were to couples where both parties were marrying for the first time*
- 1 marriage every 90 days was to a couple where both parties were teenagers*

1 DOMESTIC PARTNERSHIP DECLARATION WAS FILED EVERY 5 DAYS

Summary of Vital Events

Since 1952 the population of Nova Scotia has increased by approximately 44%. Demographic and social changes have had a dramatic impact on vital events. The birth rate has fallen to less than half the rate seen in the early 1960's, yet mortality rates have remained more or less static. The net result, in 2011, is a 'natural increase rate' of only 0.3, as the number of deaths approach the number of births each year. Emigration and immigration are not included in natural population growth rates.

- In 2011 there were 8,827 live births in Nova Scotia to NS residents. The number of live births increased by 40 births from 8,787 births in 2010. The birth rate is 9.3 births per 1,000 population.
- There were 8,525 deaths of Nova Scotia residents in 2011, up 237 deaths from the previous year. The death rate was 9.0 deaths per 1,000 population. The leading causes of death in Nova Scotia are diseases of the circulatory system and cancer; in 2011, deaths from these causes made up 57.6% of all deaths.
- A total of 4,396 marriages were solemnized in Nova Scotia in 2011. The marriage rate per 1,000 population is 4.7 and this is 0.1 lower than the 2010 rate. Marriage statistics include all marriages that took place in the province, including those where one or both parties were non Nova Scotia residents.
- Same-sex marriage was legalized in Nova Scotia in September of 2004. During 2011, there were 97 same-sex marriages solemnized in the province. Of those marriages 34 were of male couples, and 63 were of female couples.
- There were 65 stillbirths to residents of Nova Scotia in 2011. The stillbirth rate was 7.3 per 1,000 total births (live births and stillbirths).
- In 2011 there were 42 infant deaths (age at death less than one year) in the province, for an infant mortality rate of 4.8 per 1,000 live births. Of these 42 infant deaths, 32 were neonatal deaths, occurring to infants under one month of age. The infant death rate in the past five years has ranged from 3.3 to 4.8.

Table I

*Population of Nova Scotia***1952–2011**

The population of the province in the following table is given for reference purposes and comparison for the period 1952-2011

YEAR	POPULATION	YEAR	POPULATION
1952	653,000	1982	860,000
1953	663,000	1983	869,000

Part II

Detailed Summaries and Tables

Summary of Birth Statistics

- In 2011 there were 8,827 births to residents of Nova Scotia, of which 50.9% were males (4,493) and 49.1% were females (4,333). There was one birth for which sex was indeterminate.
- There were 115 births in Nova Scotia to non-residents of the province.
- The vast majority of births – 99.6% – occurred in hospital.
- Victoria and Halifax counties experienced the highest birth rate per 1,000 population at 10.8 and 10.4 respectively.
- Guysborough and Cumberland counties experienced the lowest birth rate per 1,000 population at 6.2 and 6.3 respectively.
- The 5 most populated counties together had 6,503 births or 73.7% of all the births in Nova Scotia. Births in Halifax accounted for 47.5% of the total births in the province for 2011.
- The provincial birth rate for 2011 was 9.3 births per 1,000 population. This compares to the Canadian national birthrate of 11.0 for 2011.
- Only 6.0 % of babies born in Nova Scotia in 2011 had a birth weight under 2500 grams.
- In 2011 there were 2 births to a women under the age of 15, and 491 births to women aged 15-19, for a total of 493 births to teenage mothers. This represents 5.6% of all live births for 2011. There were 171 births to teenaged fathers (aged 19 or younger), or 1.9% of live births.
- Of the 493 births to teenaged mothers, 133 were to fathers who were also 19 years of age or younger. This means 1.5% of live births in 2011 were to parents who were both teenagers.
- In 2011, 47.5% of live births were to women aged 20-29, 44.1% of live births were to women aged 30-39, and 2.8% were to women aged 40 or older. The median age of women who gave birth in 2011 was 29 years, while for first-time mothers in Nova Scotia the median age was 27 years.
- There were 141 births to parents who were both 40 years of age or older. This represents 1.5% of live births. The oldest mother was 48 years of age and the oldest father was 63.
- There were a total of 128 multiple births in Nova Scotia in 2011 - 126 births were twins and 2 births were triplets.

Another Way to Present Birth Information

Of every 100 live births in Nova Scotia in 2011, approximately

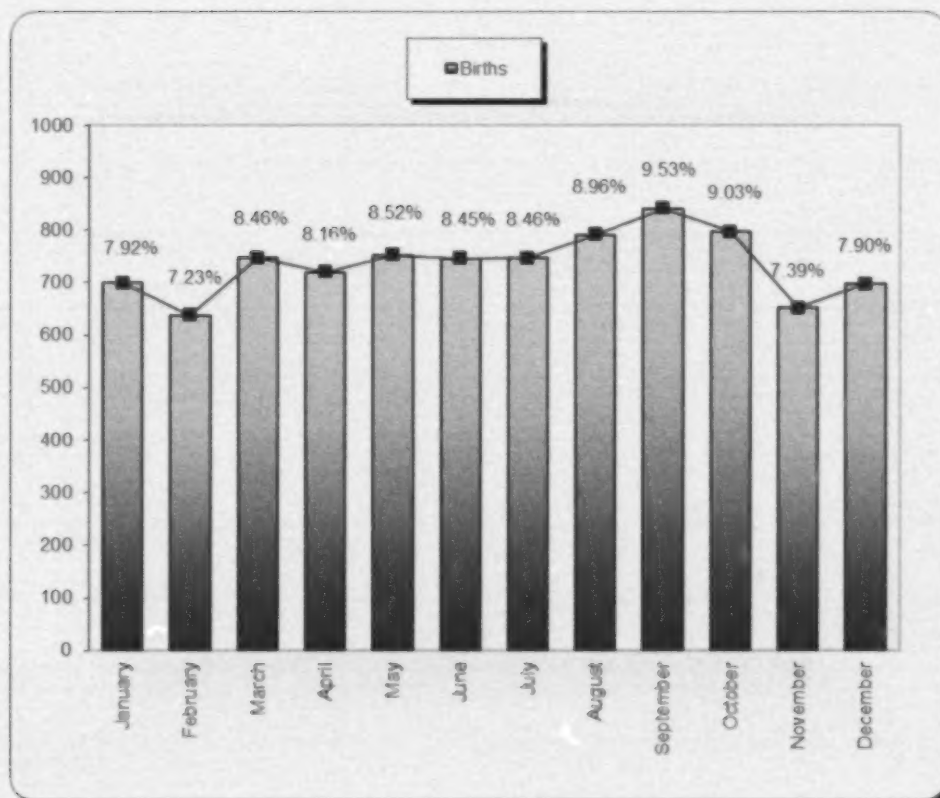

- 6 were to teenaged mothers aged 19 or under (493)
- 48 were to mothers aged 20-29 (4,194)
- 44 were to mothers aged 30-39 (3,895)
- 3 were to mothers aged 40-49 (245)
- 2 were to a teenaged father aged 19 or under (171)
- 33 were to fathers aged 20-29 (2,948)
- 48 were to fathers aged 30-39 (4,227)
- 9 were to fathers aged 40-49 (813)
- <1 was to a father aged 50-59 (61)
- <1 was to a father aged 60 and over (3)
- 7 were to fathers whose age was not stated (604)

Summary of Death Statistics

- In 2011, there were 8,525 deaths occurring to residents of Nova Scotia, of which 48.9% were males (4,172) and 51.1% were females (4,352). There was one death for which sex was indeterminate.
- Guysborough County experienced the highest death rates per 1,000 population at 14.3. Annapolis and Digby counties had the second and third highest at 13.6 and 12.7 respectively.
- Halifax and Hants counties experienced the lowest death rates per 1,000 population at 6.8 and 8.2 respectively.
- The provincial death rate for 2011 was 9.0 deaths per 1,000 population.
- There were 2,305 deaths due to diseases of the circulatory system in Nova Scotia, which is 27.0% of all deaths. Of these:
 - 604 were due to chronic ischemic heart disease – 7.0% of all deaths
 - 466 were due to acute myocardial infarction (heart attack) – 5.5% of all deaths
 - 496 were due to cerebrovascular disease, including stroke – 5.8% of all deaths
- There were 2,602 deaths due to malignant neoplasms (cancer) in Nova Scotia, 30.5% of all deaths. The greatest number of these deaths were due to cancer of the trachea, bronchus, and lung (680 deaths), colon cancer (201 deaths), and breast cancer (163 deaths).
- There were 478 deaths due to chronic obstructive pulmonary disease, 6.0% of all deaths.
- There were 342 deaths due to diseases of the digestive system, including liver disease – 4.0% of all deaths.
- There were 422 deaths due to accidents and unintentional injury – 5.0% of all deaths.
- There were 240 deaths due to diabetes – 3.0% of all deaths.
- There were 213 deaths due to influenza (20) and pneumonia (193) – 2.5% of all deaths.
- There were 110 deaths due to intentional self-harm (suicide).
- Nova Scotians are most likely to die in hospital:
 - 5,058 died in hospital
 - 1,518 died at home
 - 1,636 died in another healthcare facility (i.e. nursing home)
 - 313 died at another locale
- 49.64% of those who died during 2011 were aged 80 years or over.

*** Rate per 100,000 census population.

** Rate per 100,000 estimated population for intercensal years, except where noted as otherwise.

* Prior to 1950, total of Class VII, Diseases of the Circulatory System, with the addition of No. 58, Acute Rheumatic Fever, was taken from Class III. From 1950 onward, Class VIII includes Acute Rheumatic Fever.

Summary of Stillbirth, Maternal Death and Infant Death Statistics

- Stillbirths are defined as delivery of a fetus that is 500+ grams in weight or 20+ weeks in gestation and where there is no breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscle.
- In 2011 there were 65 stillbirths to mothers who were residents of Nova Scotia, which is a rate of 7.3 per 1,000 live births. The Canadian national rate for stillbirths in 2009 (the last reported year) was 7.1 per 1,000 live births.¹
- In 2011, there were 42 infant deaths (death occurring to a child under 1 year of age) in the province, for an infant mortality rate of 4.8 per 1,000 live births. Of these 42 infant deaths, 32 were neonatal deaths, occurring to infants under one month of age. The infant death rate in the past five years has ranged from 3.4 to 5.5. The Canadian national infant death rate for 2010 (the last reported year) was 5.0 per 1,000 live births.² Nova Scotia has been consistently at or below the national infant death rate.
- The leading category of causes of infant death in Canada is 'Certain Conditions Originating in the Perinatal Period,' which includes conditions which have their origin in the perinatal period (before and during labour) even though death (or morbidity) occurs later.^{3,4} This is also the leading cause of infant death in Nova Scotia. There were 20 deaths in this category. For specific causes of death in this category, please see Table XVI.
- There were 13 infant deaths attributable to congenital malformations, deformations, or chromosomal abnormalities.

Summary of Marriage and Domestic Partnership Statistics

- In 2011, 4,396 marriages took place in Nova Scotia. This includes all marriages that occurred in the province, including the marriages of non-residents.
- Of those 4,396 marriages:
 - 4,299 were opposite sex couples
 - 63 were same sex female couples
 - 34 were same sex male couples
- The median age for a first marriage in 2011 was 30 years. For men, the median age was 32 years and for women, 30 years. 3,332 single women and 3,229 single men married in 2011.
- The median age of those marrying for the 2nd or subsequent times was 52 years. For 1,028 women and 1,102 men marrying in 2011 this was not a first marriage.
- 2,268 marriages in 2011 were solemnized by a clergy member, while 2,128 were civil ceremonies.
- Summer is the most popular time for a wedding; August was the most popular month, with 946 weddings, followed by July (906) and September (659).

Chart VII***Domestic Partnerships: Gender of Partners, Nova Scotia, 2011***

Glossary of Terms

Birth Rate

The number of live births divided by the mid-year population and converted to a rate per 1,000 population.

Birth Weight

The first weight of the fetus or newborn recorded after birth.

Domestic Partnership

A relationship between two individuals who are cohabiting or intend to cohabit in a conjugal relationship who have filed a domestic-partner declaration in accordance with the *Vital Statistics Act*

Gestation Period

The time between the conception and birth of an infant, recorded in completed weeks.

Infant Death

The death of a child aged between birth and one year of age.

Infant Mortality/Death Rate

The number of deaths of children under one year of age expressed as a rate per 1,000 live births.

Live Birth

A complete expulsion or extraction from the mother, irrespective of the duration of the pregnancy, of a fetus in which, after expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord or definite movement of a voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.

Live Birth Order

The number of live births to the mother, including this birth.

Low Birth Weight

A birth weight of less than 2,500 grams.

Marriage Rate

The number of marriages divided by the mid-year population and converted to a rate per 1,000 population.

Maternal Death

Death of a woman while pregnant or within 42 days of termination of pregnancy from causes related to the pregnancy, but not from accidental or incidental causes.

Maternal Death Rate

The number of maternal deaths divided by the number of live births and converted to a rate per 1,000 live births.

Mortality/Death Rate

The number of deaths divided by the mid-year population and converted to a rate per 1,000 population.

Natural Increase Rate

Excess of births over deaths expressed as a rate per 1,000 population. It does not include increases due to immigration or decreases due to emigration.

Neonatal Death

The death of an infant aged between birth and 28 days of age.

Population

Mid-year population estimates used in the preparation of this report were obtained from Statistics Canada, Demography Division.

Perinatal Period

The period commencing at 22 completed weeks of gestation and ending seven completed days after birth.

Stillbirth

The complete expulsion or extraction from its mother after at least twenty weeks pregnancy, or after attaining a weight of five hundred grams or more, of a fetus in which, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscle

Stillbirth Rate

The number of stillbirths divided by the number of live births and converted to a rate per 1,000 total births.

Teenage Mother

Mothers aged 19 or less at the date of birth.

Total Births

The number of live births plus stillbirths, used to calculate rates as in Stillbirth Rate above.

Vital Events

Births, deaths, stillbirths, marriages, and domestic partnerships; all events which have to do with an individual's entrance or departure from life, together with changes in civil status.
